

SUMMARY

Tech Lead with **6+ years** in software development, including **4+ years** owning backend architecture for high-load, distributed systems. Currently directs technical decisions for a **9-person** team, building on a track record of systems that process **~1,000 transactions/second** (peak **~3,000/second** under load), cut latency by **~57%**, and bring validation time under **400ms** (down from 1,000ms) under heavy concurrency (200–500 concurrent requests). Led the design and rollout of an in-house **AI-Driven Development (AIDD)** toolkit that lifted developer output by **~63%** and automated **~87%** of the team's test cases. Strong technical foundation in C#, ASP.NET Core, ABP Framework, Microservices, and Clean Architecture, paired with hands-on mentoring, code review standards, and cross-functional delivery.

KEY SKILLS

ARCHITECTURE - Microservices, DDD - Clean Architecture - Event-Driven Design, System Design	BACKEND - C#, ASP.NET Core, ABP Framework - EF Core, REST, gRPC - FastAPI, Flask, Node.js, Spring	LANGUAGES - C#, SQL, TypeScript - Python, Java
LEADERSHIP & PRACTICES - Team Leadership, Mentoring - Code Review Standards - AIDD Tooling (BaKit, DevKit, QcKit) - Agile/Scrum, Delivery Planning	DATA & MESSAGING - PostgreSQL, SQL Server, MongoDB - Redis, Kafka, SignalR, Socket.IO	FRONTEND - Angular, Next.js, React TOOLING - Docker, Git

WORK EXPERIENCE

Tech Lead (*Engineering Manager*) Mar 2026 – Present
Viet Nang Knowledge Resources JSC

- Promoted from Senior Developer within 8 months to lead a **9-person cross-functional engineering team**, owning technical direction, architecture, and code-quality standards across every HRM workstream.
- Drive technical planning and design reviews, turning product priorities into an actionable engineering roadmap and improving delivery predictability across the team.
- Improved on-time sprint delivery rate from **65% to 90%** within the first five months as Engineering Manager, through structured sprint planning and design-review discipline.
- Designed and rolled out an in-house **AIDD (AI-Driven Development) plugin suite** to standardize and automate the team's workflow:
- BaKit** — automates business analysis, cutting average documentation drafting time from ~5 to ~2 days (**~60% faster**) across 70 documents drafted in June–July 2026.
- DevKit** — accelerates coding with correct syntax and business logic built in, lifting developer output by **~63%** (8 → 13 story points/sprint per developer) across 8 developers over 4 sprints.
- QcKit** — automates **~87% (260/300)** of test cases within two months of rollout, producing more reliable QC reports.
- Mentors 8 developers through code review and pairing, and sets reliability standards across the team's high-load production systems.

Focus: Technical Leadership, System Design, AIDD Tooling, Clean Architecture, Microservice, Kafka, Agile

Senior Developer

Jul 2025 – Mar 2026

Viet Nang Knowledge Resources JSC

- **Human Resource Management System** — a multi-module HR platform serving a **20-person** cross-functional team.
- Led a **4-engineer** team designing and building the Objectives & Evaluation modules, with reliable data synchronization from third-party HR systems.
- Built a centralized notification system with configurable email templates, delivering across **multiple channels** and business domains without cross-channel bottlenecks.
- Designed a No-code / Low-code configuration mechanism that shortened partner deployment time and gave non-technical staff more flexibility to configure the platform themselves.

Tech: C#, Angular, Clean Architecture, Microservice, Redis, Kafka, PostgreSQL, SignalR

Senior Developer

Jan 2023 – Jun 2025

Truong Minh Thinh JSC

- **Order Management System** — processed **~1,000 orders/second** on average (peak **~3,000/second** during promotion/flash-sale spikes) from partner platforms with real-time intake; redesigned the message-queuing pipeline (Kafka partitioning + Saga pattern + Redis distributed lock + Redis-based quota), cutting average latency from ~700ms to ~300ms (**~57%**), measured over the first month post-pilot; built webhook forwarding with automatic retries for resilient partner delivery. Team of 4, wearing three hats: Backend Developer, Database Designer, and Analyst. **Tech:** C#, ABP, Microservice, PostgreSQL, Redis, Kafka, Webhook, gRPC
- **Promotion Management System** — designed atomic quota validation to prevent over-application under high concurrency, cutting validation time from **1,000ms to under 400ms (~2.5x faster)** under 200–500 concurrent requests, for a 10-person team. **Tech:** C#, ABP, Microservice, PostgreSQL, Redis, Kafka, gRPC
- **Loyalty Management System** — delivered sub-second point accrual across channels for end users, with reward redemption via product or QR-code scan. Team of 10. **Tech:** C#, ABP, Microservice, PostgreSQL, Redis, Kafka, Webhook, gRPC
- **Product Distribution System** — owned the stack end-to-end (backend, Angular frontend, dev-ops) for a 10-person team, routing traffic through a YARP API gateway across microservices. **Tech:** C#, ABP, Angular, TypeScript, PostgreSQL, Redis, Kafka, Firebase, MongoDB, YARP Gateway

Junior Developer

Jan 2021 – Dec 2022

Truong Minh Thinh JSC

- **Centralized Messaging (Upgrade)** — upgraded the legacy codebase, improving system performance and reliability. Team of 4. **Tech:** Python, FastAPI, MongoDB, Angular, TypeScript
- **Product Management & Collection System** — built a scraping pipeline collecting product data from domestic and international e-commerce platforms. Team of 5. **Tech:** Python, FastAPI, MongoDB, Angular, Selenium, Socket.IO

Intern

Jul 2020 – Dec 2020

Truong Minh Thinh JSC

- **Centralized Messaging Management System** — aggregated messages from multiple social media platforms into a single management system. **Tech:** Python, Flask, Angular, TypeScript, MySQL

PERSONAL PROJECTS

- **SIM Management System** — centralized platform for managing and controlling SIM banks, integrating GSM hardware with a web dashboard. **Tech:** Python, FastAPI, Flask, MongoDB, Linux, Next.js, TypeScript, Prisma, GSM, Redis
- **Household Electrical Appliances Website** — e-commerce site for household appliances, covering product catalog and order management. **Tech:** Next.js, TypeScript, SQL Server, IIS, Prisma, SSR
- **Steel Materials Website** — e-commerce site for steel materials, covering product catalog and order management. **Tech:** Next.js, TypeScript, SQL Server, IIS, Prisma, SSR

EDUCATION

FPT Polytechnic College, Da Nang

Aug 2018 – Dec 2020

Software Applications

- GPA: 8.9 / 10

LANGUAGE

English: Intermediate · Vietnamese: Native
